Professional Summary

Software Engineer with 2+ years of experience designing and developing scalable web applications using Java, TypeScript, React.js, Next.js, Node.js and SQL. Strong foundation in Data Structures, Algorithms, Object-Oriented Programming, REST APIs and SDLC. Passionate about solving real-world problems, learning new technologies and building high-quality software through collaboration, testing and continuous improvement.

Technical Skills

Languages	Java, JavaScript, TypeScript, Python, SQL
Frontend	React.js, Next.js, HTML5, CSS3, Tailwind CSS, Redux Toolkit
Backend	Node.js, Express.js, REST APIs
Databases	PostgreSQL, MongoDB, MySQL, SQL Server
Tools	Git, Docker, Postman, VS Code, Firebase
Core Concepts	OOP, DSA, DBMS, SDLC, Agile, Problem Solving, API Integration

Professional Experience

Bees Software Solutions

Hyderabad

Software Engineer

Feb 2025 – Present

- Developed and maintained enterprise web applications using React.js, Next.js, TypeScript and RESTful APIs in an Agile environment.
- Built reusable UI components, integrated backend services and optimized application performance through efficient rendering and API communication.
- Collaborated with cross-functional teams to debug production issues, review code and deliver high-quality software releases.
- Worked with Git, Docker and SQL databases while following SDLC best practices.

Skills Marathon

Remote

Full Stack Developer Intern

Nov 2024 – Jan 2025

- Developed Learning Management System modules with authentication, course management and REST API integration.
- Built responsive interfaces, fixed defects and contributed to feature implementation in an Agile development workflow.

Key Projects

AI Question Paper Generation System

JavaScript, Python, Node.js, React.js, AI, PDF Parsing, Regular Expressions

- Developed an AI-powered platform that automatically generates question papers from uploaded PDF, Word and Excel documents.
- Implemented PDF parsing and content extraction using regular expressions and document processing techniques to identify questions, marks and metadata.
- Built semantic search workflow to reduce duplicate questions and improve question selection accuracy.
- Designed configurable paper generation with subject, difficulty level, marks distribution and question type selection.

Digital Evaluation System

React.js, Node.js, SQL Server

- Developed a digital answer-sheet evaluation platform with PDF annotation, evaluator workflow management and secure authentication.
- Integrated SQL Server and REST APIs to streamline evaluation, result processing and reporting.
- Improved productivity by reducing manual evaluation effort through workflow automation.

PropertyHub

Next.js, TypeScript, PostgreSQL

- Built a modern real-estate application supporting property listings, search filters, image uploads and responsive dashboards.
- Implemented optimized API communication, efficient database queries and reusable UI components.

Education

Narasimha Reddy Engineering College
Bachelor of Technology (Cyber Security)
CGPA: 9.0

Hyderabad
2021–2025

Achievements

- Solved 300+ Data Structures and Algorithms problems.
- Built multiple production-ready full-stack applications using modern web technologies.
- Strong interest in software engineering, scalable systems and continuous learning.
